

Opening Screen - how can we make this more appealing? Everything is so small on PC. It'd be nice if it scaled more so there wasn't so much blank space!

Same issue on this screen! Less blank space needed.

Again blank space issue. Also accessibility the black text on the non selected difficulty is hard to read. Also the message is corny and reads AI vibe coded.

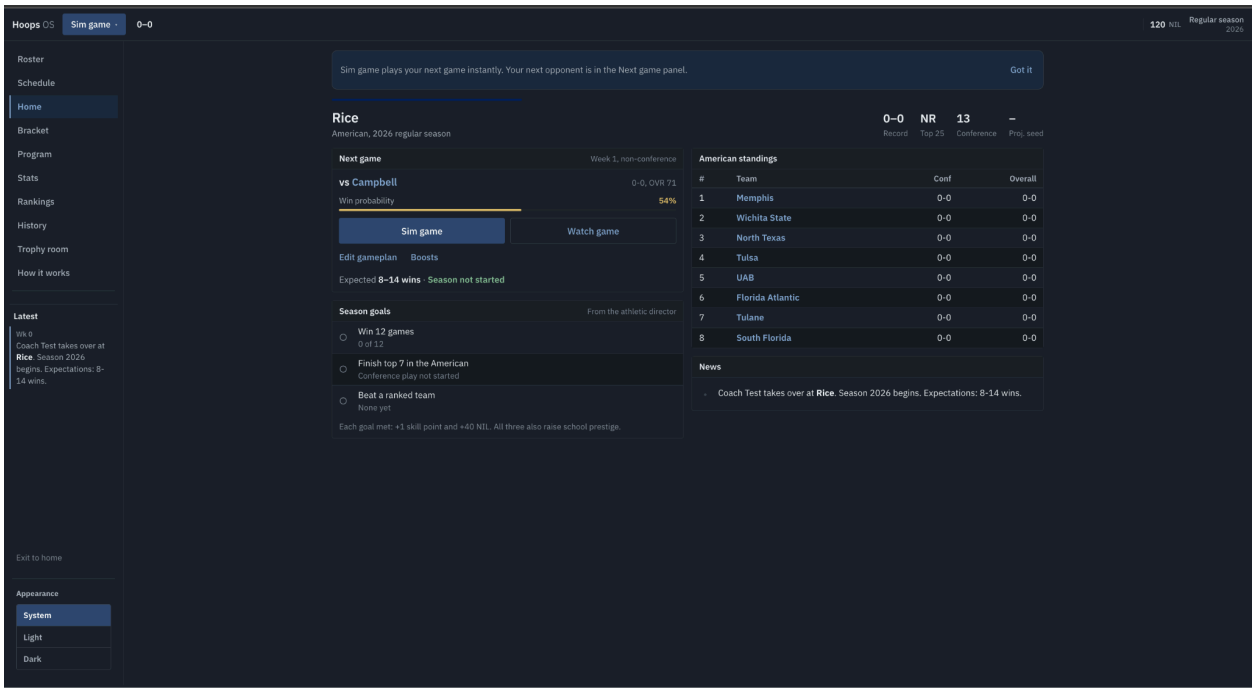

“Welcome, Coach ___” works. “Let’s Get to Work!” or “Time to dive in” would be better than the 30 years old thing. We don’t have an age mechanic built into the game. It’s unnecessary info.

Utilize more space like before, also sort alphabetical, by ovr and by prestige would be nice. Maybe a way to pick random entry level program too.

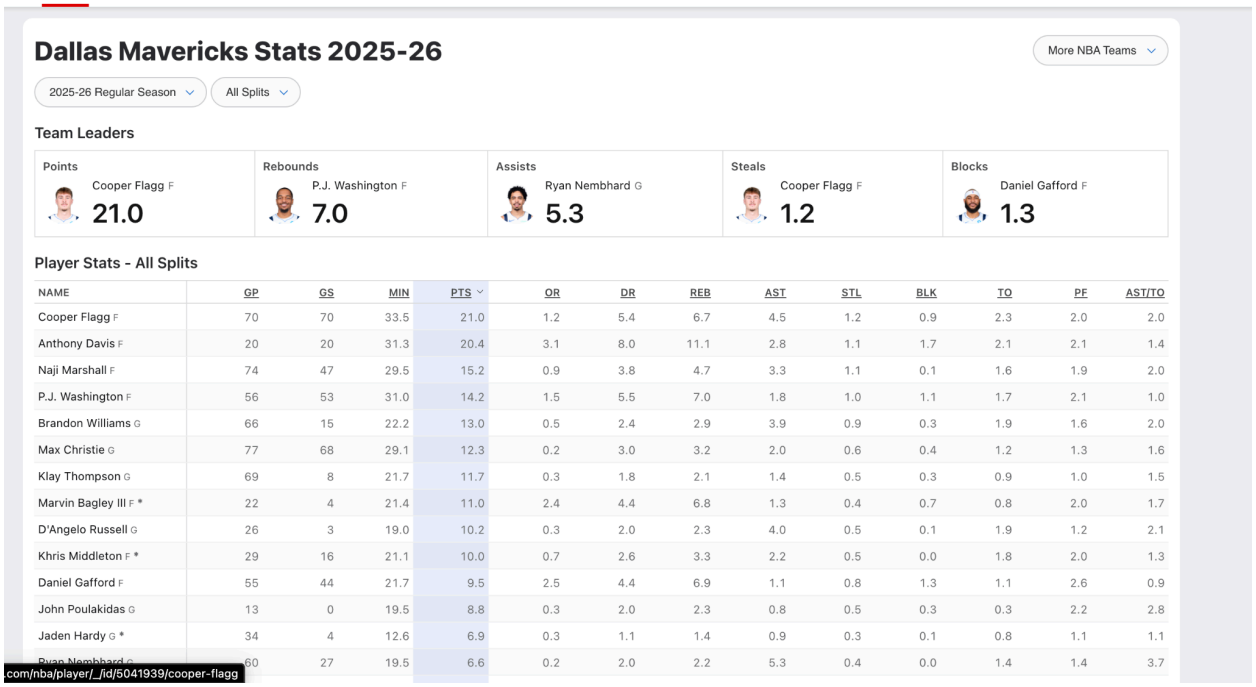

space thing here too.

Again space. I’m going to stop screenshotting screens and saying space. Just keep it in mind for everything!

It'd be cool to make this a bit more alive. I think we could maybe merge roster with stats. Make the page more robust. I will include a couple examples from other places of what an overhaul might look like.

Alot of vibe codey stuff here.

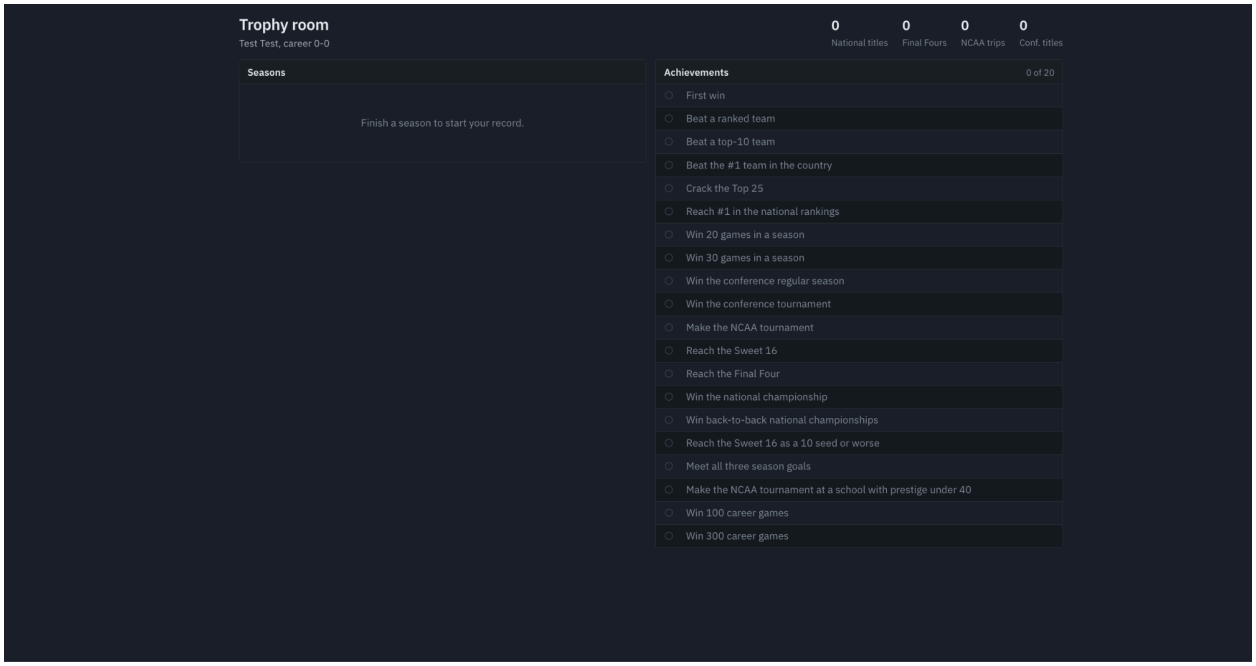

Every season, every title, every milestone — the permanent record. (this for example should just be removed. Only dummies wouldn't know what this is. Instead of dynasty history - we should rename to "History".

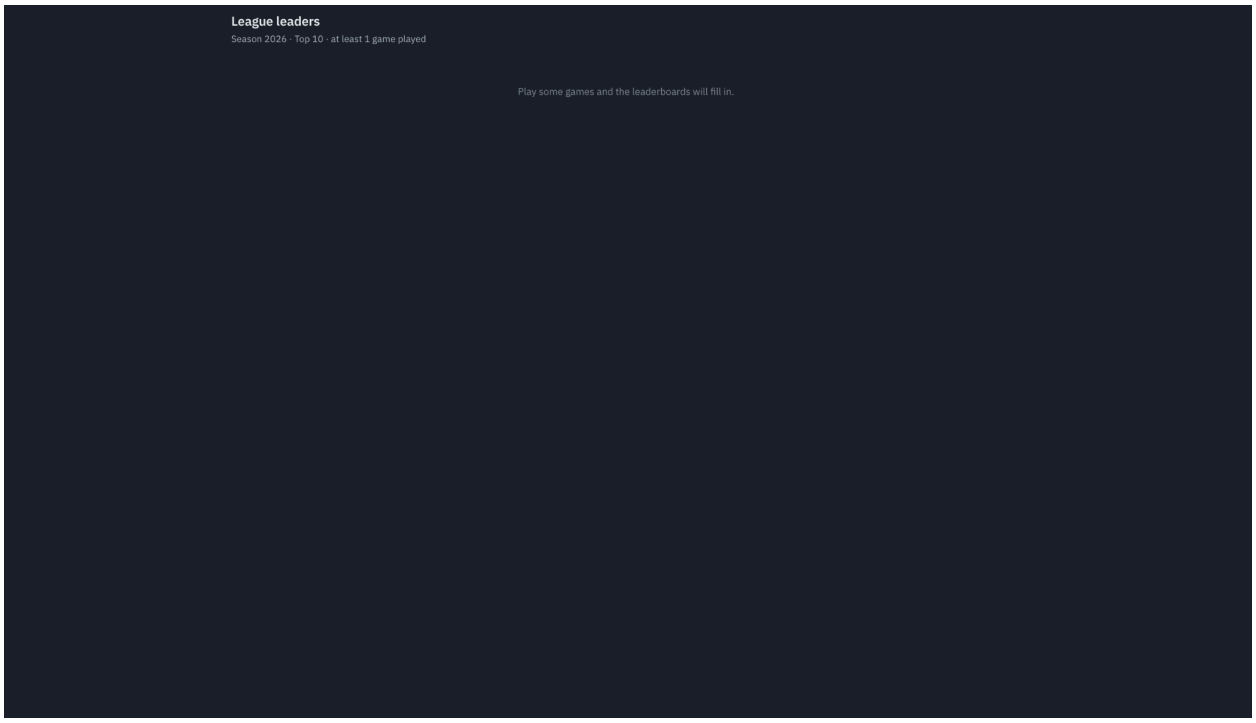

Just "No completed seasons yet."

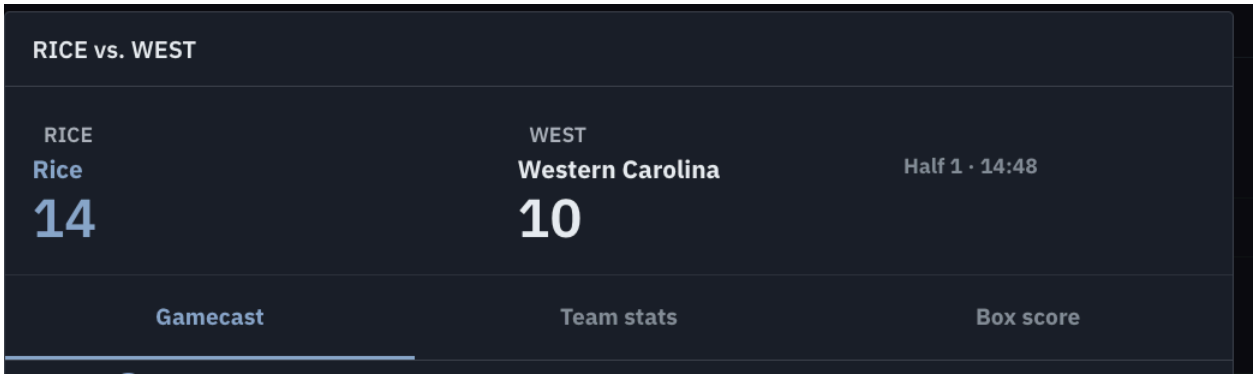

Don't like the text here either. Not sure what to put. But less ai vibe codey pls.

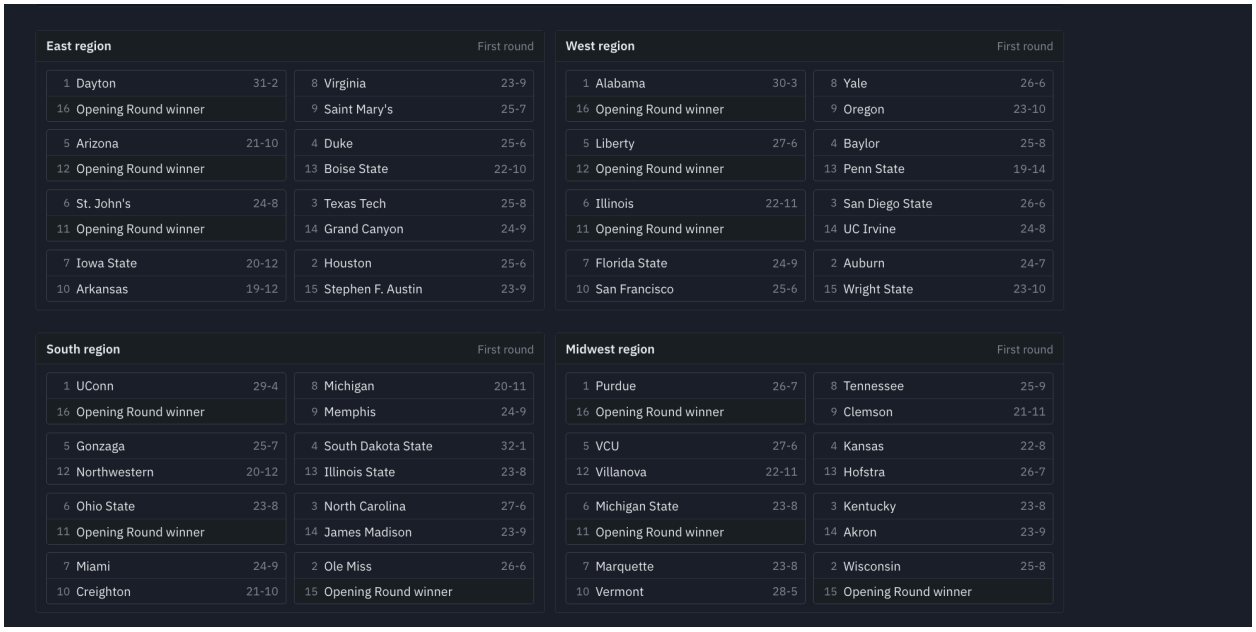

Same space thing but also rename to Coach History

Rename stats to League Leaders

Put time in middle, away team on left, home team on right. Additionally the top should read away team @ home rather than the current away vs home. - if at neutral site keep convention but assign better seed as home team.

Our bracket should look more like espn or ur run of the mill bracket rather than the albatross it is rn. - more compact if feasible.

We should also have a sim through tournament button next to the sim through current round button.

This is our transfer/not transfer thing. Above that is the basketball gm pending free agency screen. Notice how the basketball gm one just feels more alive and easier to navigate. The current screen is dog water. We should attempt to emulate the basketball gm but modify it for college. Same stuff we're doing not but cleaner ya feel?
